

CanTalk offers free live over-the-phone language service in support of Syrian re-settlement

[Feb.1, 2016] To assist with the settlement activities for arriving Syrian families, CanTalk (Canada) Inc. is offering to provide services aimed at removing language barriers! The proposal is 20,000 FREE minutes of IMMEDIATE and LIVE over-the-phone language service anywhere and anytime within Canada, specific to Manitoba companies and organizations.

These language services may be used to assist those on the frontlines of re-settlement service provision – be it medical, relief, transportation or whatever requirement might arise. CanTalk will provide Interpretation over-the-phone in the Arabic language for organizations, not-for-profits, front line agencies, schools, etc.

CanTalk's language service is straightforward to use. All that's required is a phone at the point when immediate language support is needed. Within seconds, CanTalk will connect a live language interpreter to either sponsors of resettlement initiatives who don't speak Arabic, or Syrian families so they can communicate in their native language.

- A specific toll free 1-800 number will be provided
- A CanTalk facilitator will answer the call with a customized greeting such as "Syrian Re-Settlement Support line"
- The CanTalk language facilitator will transfer the call to an interpreter. Typically it takes less than 60 seconds for the interpreter to come on the line
- The call will then proceed with the interpreter

For more than 20 years, CanTalk Canada, a home-grown Manitoba company, has provided ON DEMAND language services to clients across North America. Through the provision of over 155 languages, it delivers immediate, live, over-the-phone interpretation for many emergency-based situations - health related, legal, federal and provincial, as well as general information requirements.

Call CanTalk today to learn more about our Syrian Re-Settlement Support (SRS) interpretation program and to enroll your business for this free service.
